

Pharmaceutical Formulation Intern

Job Purpose:

This internship position is designed to support the Development Center in the formulation of new pharmaceutical products. It offers a hands-on learning opportunity for individuals pursuing a career in pharmacy or related scientific fields, providing exposure to practical aspects of drug formulation and development.

Key Responsibilities:

- **Product Development Support:** Assist in various stages of new product development, including material preparation, pre-formulation studies, laboratory-scale experiments, and optimization trials.
- **Documentation:** Maintain accurate records of all development activities, experiments, and findings.
- **Laboratory Assistance:** Support routine laboratory operations, such as equipment calibration/validation, maintaining a clean and organized workspace (5S), managing inventory, and updating templates.
- **Quality and Safety Practices:** Adhere to quality control standards and safe working practices in the laboratory.

Qualifications:

- **Educational Background:** Currently pursuing a degree in Pharmacy, Chemistry, Pharmacology, or a related scientific field.
- **Experience:** Previous laboratory experience is beneficial but not required.
- **Technical Skills:**
 - Basic understanding of dosage forms, ingredients, and laboratory equipment.
- **Behavioral Competencies:**
 - Proficiency in English and Microsoft Office (Word, Excel, PowerPoint).
 - Eager to learn and reliable in task completion.
 - Creative and results-oriented approach to problem-solving.
 - Good analytical skills with an ability to process complex information.
